EXPLAINS WHY NATURAL RIGHTS VIOLATIONS
LEGITIMATE NIXING OF NATIONAL GOVERNMENT**

ZULFIKAR MOINUDDIN AHMED

United States Government,

You see, the Preamble of the United States Declaration is clear about the purpose and scope of government. Recall that I am American.

My natural rights have been brutally, savagely, and horribly violated by Bill Gates. This reflects very poorly on the United States Government. Bill Gates is a born hard-core dyed-in-the-wool criminal. It is extremely unfortunate that the United States Government did anything other than wipe him out for the safety and well-being of the American people.

Since governments are instituted among men to secure all Americans' natural rights, including mine, and I know how deceptive, how evil, how malevolent, how criminal he has been since early age, it is a matter of Conscience for me to ensure that people understand that United States Government is not allowed to stand at all if Bill Gates is not eliminated.

I can write tomes about how I have suffered by his illegitimate exercise of (a) Black Magic, (b) US Industrial Power, and (c) US War Power in my personal meta nonstop for more than a year including obstructing all legitimate income – \$620 million from Finance – as well as tenured full professorship for my great works in human nature which are milestones in two millenia in human knowledge of moral nature of Man. I have plans for improvement of Life Satisfaction levels for the entire globe that are also infinitely more important than the various Mickey Mouse achievements that Bill Gates has taken credit for publicly over the past four decades.

Date: April 9, 2022.

There are several issues: (a) my achievements are provably my own and no one can trust that any achievements of Bill Gates are actually his own, (b) those achievements that Bill Gates has taken credit for are not as important as mine.

I am glad that United States Government has examined that Bill Gates has been guilty of (a) war crimes, (b) aggressive harm to me for both religious hatred and racial hatred. These are just tips of the iceberg to the problems with Bill Gates. United States Government ought to be replaced totally in my view if, in the end, Bill Gates is not totally wiped out because it is irresponsible of any government whose record of natural rights is so weak to then go out of their way to sponsor, aid and abet, and support at all costs such an outrageously criminal man who has no good value for the human race at all and is a purely destructive evil force in the world.

1. BILL GATES CHOSE THE WRONG VICTIM FOR HIS RACIAL HATRED AND AGENDA

Bill Gates' explicit agenda is to revive Jim Crowe style racial laws in America and White World Order shredding natural rights of non-white peoples of Earth. He unfortunately chose the wrong victim for this. You see, most non-white people in America define their identity more by their ethnicity than myself. I am of Bengali origin, but I have assimilated into American culture with a strong Victorian English influence and intellectually and spiritually as well I am influenced by many European cultures and I am an advocate of a Single Human Race for my own works.

Let me show you how this works. I will use a reputable poll from Pew for this [1]. The poll shows that only 5% of white Americans *define themselves* by their ethnicity in the sense that they think their ethnicity is 'very important' to their identity. Bill Gates' Jim Crowe racial law revival requires a democratic consensus for passage of laws. With 40% of American non-whites strongly opposed to having their natural rights shredded, and 95% of whites not believing their ethnicity as important to their identity and in addition 94% of Americans believing that universal natural rights are important, Bill Gates' efforts to *revive* racial laws within the nation will have impossible democratic support, so he will be forced to attempt to *corrupt the democratic republic* if he wants to succeed. Given that he is now found guilty of criminal violations of my natural rights, the chances of his success in his agenda is quite a bit less now because I have made public his actual agenda.

Before the French Revolution going against the democratic consensus to establish political orders were still quite difficult but possible, but the probability of success in such an effort in 2022 seems close to zero by my assessment.

Thank you,
Zulfikar Moinuddin Ahmed
